EDUCATION

Minerva University San Francisco, CA
Bachelor of Science in Computational Sciences *May 2028*

TECHNICAL SKILLS

Programming Languages: Typescript, Javascript, HTML/CSS, Python, SQL, Redis
Frameworks: React, Next.js, Node.js, tRPC, Astro.js,
Design & Developer Tools: Figma (UI/UX Design), Git, AWS S3, Upstash, Clerk, Sentry.JS
Libraries: Tailwind CSS, React Query, Zustand, Xstate, Redux Toolkit, React Flow

EXPERIENCE

Yandex LLC June 2024 – August 2024
Frontend Developer Intern *Moscow, RU*

Yandex Lavka - Lead highload e-grocery service with 1000+ rps in Russia

- Improved debugging workflow for **30+ developers** by developing a end-to-end Playwright test reporter, integrating with CI pipeline, and iterating through 3 design reviews
- Implemented game entry points, resulting in a boost in feature engagement (specific metrics under NDA)
- Enhanced admin panel with new product fields across large-scale monorepo using **Redux and React**
- Delivered redesigned goal card feature for the rewards system, improving user experience

Freelance December 2022 – May 2024
Fullstack Developer & UI/UX Desinger *Remote*

- Increased course sign-ups by **15%** by building an automated registration funnel using React and **Mobile-First Design** for branch of National Medical Academy
- Attracted **1000+** applications by developing a responsive marketing website for the World Space Olympiad and Almaty Physics Battle using Astro.js and Tailwind CSS
- Engineered real-time transaction automation system on SyncSwap DEX using REST API with message queues and Redis
- Designed intuitive user interfaces and interactive prototypes for all projects using **Figma**

Young & Yandex, School of Frontend June 2023 – August 2023
Frontend Track *Almaty, Kazakhstan*

- Developed a musician-label platform using React and Redux Toolkit with a **10+** developers
- Created a custom ESLint plugin using Abstract Syntax Tree (AST) for import sorting
- Optimized load speed by **40%** through lazy loading and code splitting

nFactorial Incubator June 2023 – August 2023
Web Development Track *Almaty, Kazakhstan*

- Built full-stack apps with the TypeScript, and Next.js that had generative AI with **200+** users
- Selected for Central Asia's top bootcamp **(5% acceptance rate)** focused on web and AI technologies

PROJECTS

Admit AI | *NextJs, React JS, Stripe, Zustand, Tailwind, OpenAI* October 2024 – December 2024

- Developed an AI-driven college draft essay generation and had 600+ users
- Integrated Stripe to make payments
- Designed landing page that had **15200** page views from 40+ countries

Systems GPT | *NextJs, React, XState, Redis, AI, Tailwind, React Flow* June 2023 – August 2023

- Architected and developed an AI-driven goal management platform using **Next.js and React**, enabling users to generate personalized goals and dynamically break them down into actionable tasks.
- Developed a dynamic goal visualization system using **React Flow**, enabling users to see their main objectives and sub-tasks in an interactive tree structure
- Orchestrated complex state management with **XState**, handling goal generation workflows
